MFG Select Infrastructure Fund - Class 2

Key Facts

Portfolio Manager	Gerald Stack
Fund Inception Date	6 May 2019
Total Select Infrastructure Assets[1]	GBP £4,892.6 million
Fund Size	GBP £193.6 million

Objective

Seek to achieve attractive risk-adjusted returns over the medium to long-term while reducing the risk of permanent capital loss

Approach

Concentrated 20-40 stock portfolio applying MFG Asset Management's proprietary infrastructure classification

Valuation driven benchmark-unaware strategy

Highly defensive, inflation-linked exposure

GBP Performance

	Fund (before fees)	Fund (after fees)[2]	S&P Global Infrastructure NTR Index
1 Month (%)	0.8	0.7	1.8
3 Months (%)	-3.6	-3.8	-2.4
6 Months (%)	1.3	0.9	1.1
Since Inception (% p.a.)[3]	10.3	9.7	8.7

	Fund (before fees)	Fund (after fees)[2]	S&P Global Infrastructure NTR Index
2019 (%)	10.3	9.7	8.7

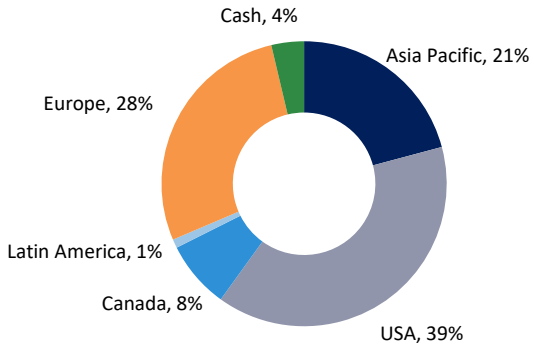

Top 10 Holdings

	Sector[4]	%
Transurban Group	Toll Roads	6.6
Atmos Energy Corp	Gas Utilities	5.9
Atlas Arteria	Toll Roads	5.5
Enbridge Inc	Energy Infrastructure	5.2
Aena SME SA	Airports	5.1
Aeroports De Paris	Airports	5.0
Xcel Energy Inc	Integrated Power	5.0
Eversource Energy	Integrated Power	4.8
Sempra Energy	Gas Utilities	4.5
Sydney Airports	Airports	3.9
	TOTAL:	51.5

Sector Exposure[4]

Geographical Exposure[4]

1 Comprised of all Select Infrastructure strategies.
2 Management Fee for the Fund is 0.80% per annum.
3 The inception date of the Fund (Class 2) is 6 May 2019.
4 Sectors are internally defined. Geographical exposures are by domicile of listing. Exposures may not sum to 100% due to rounding.
* Returns are only for part year

Fund Commentary

The portfolio recorded a negative return for the quarter. Stocks that detracted the most on a contribution basis included the investments in Aguas Andinas of Chile, Atmos Energy of the US and Societa Iniziative Autostradali e Servizi, or SIAS, of Italy. Aguas Andinas plunged 20% as talk intensified that street riots over the cost of living would prompt the Chilean government to cut the rate of return the water utility enjoys. Atmos shed 1% as a rise in bond yields lead to a snubbing of safer equities over what proved a weak quarter for utilities. SIAS lost 6.7% due to uncertainty over the regulatory framework for Italian toll-road operators.

The stocks that added the most on a contribution basis were the investments in Enbridge of Canada, ADP of France and Sydney Airport. Enbridge rose 13% after adjusted earnings per share of 56 Canadian cents beat forecasts. ADP added 8% after higher traffic helped third-quarter earnings and the latest counts showed the campaign to force a referendum on whether or not the French government could sell all or some of its 50.6% stake in the Paris airport system was well short of the number needed. A change to the French constitution in 2008 allows a referendum on certain issues if 20% of members of parliament and 10% of the electorate – about 4.7 million people – back the proposal. The latest counts showed barely one million people have signed the online petition that has until March to reach its target. Sydney Airport rose 10% after domestic traffic rose and an inflation result of 1.7% for the 12 months to September increased talk that interest rates would stay low in Australia.

Movements in benchmark indices and securities are in local currency unless stated otherwise.

Stock story: American Water

In the US, more than two trillion gallons (9.1 trillion litres) of water are lost each year – that means 20% of treated water is wasted. About 900 billion gallons (4.1 trillion litres) of untreated sewage every year pours into US waterways. The problem is about 240,000 water mains break each year, which is no surprise given that many of country's pipes were laid early to mid-last century and they had a lifespan of only 75 to 100 years. This year, 44% of US water-pipe infrastructure is expected to be assessed as 'poor', 'very poor' or 'life elapsed', another way of saying 'needs replacing'. As for quality, the American Society of Civil Engineers gave US drinking water a 'D' in 2017 while the country's wastewater facilities was rated 'D+' – some of the body's harshest assessments of US infrastructure.

Billions of dollars would need to be spent in coming years to improve the US's water and wastewater systems. But this will be difficult given the size and fragmented nature of the industries. The US is home to about 50,000 water systems where 84% of the population is served by water systems run by municipal authorities. About 10,000 of the US's water systems serve fewer than 3,000 customers and about 1,400 are under some sort of enforcement action to remedy deficiencies. The country maintains 15,000 wastewater systems where 98% of the US population is served by city authorities. About 2,200 of these wastewater systems are under some sort of formal enforcement action. (By way of comparison, the US hosts only 3,800 electrical and 1,400 gas systems.)

American Water Works, the largest listed water utility in the US, eyes the problems with the US's water and wastewater systems as an opportunity to expand while earning higher returns for investors from what is a low-risk industry operationally – unlike gas lines, water mains and pipes typically don't explode. The strategy of the New Jersey-based company that earned US$3.4 billion in revenue in fiscal 2018 from servicing 14 million people across 46 US states and one Canadian province has three prongs.

American Water's main focus is to boost the amount of capital on which it can earn a regulated but fair return by spending US$20 billion to US$22 billion over the next 10 years to improve its network. In the US (and elsewhere), utilities are granted monopoly rights in an area. In exchange, regulators ensure essential services stay affordable by limiting the return a utility can earn on its capital investment. The setup means that the best way for a utility to boost revenue is to increase the amount of approved capital spending on which it can earn a regulated return.

American Water, which enjoys an average weighted return of 9.8% from its regulated activities, expects to replace nearly 2,000 miles (3,200 kilometres) of mains and collection pipes over the next five years. As American Water has typically replaced only about 0.8% of its pipeline network a year (which, in industry jargon, translates to a 130-year replacement cycle), the company has a vast opportunity to invest in its network to ensure robust growth in regulatory revenue in coming years.

American Water's second prong is to expand through takeovers. American Water plans to spend up to US$1.2 billion on acquisitions from 2020 to 2024 and there are plenty of targets because only 16% of the US's water systems and just 2% of the wastewater systems are investor-owned. Last year, the company finalised 19 purchases in eight states that added more than 50,000 regulated connections. That boosted the number of deals completed since the start of 2015 to 82, which came with 173,000 new customers in 10 states.

The city authorities that operate many water systems in the US are keen to sell because offloading assets eases their financial stress and they are under political pressure to improve water quality – something American Water is better at than they are. That American Water has a strong operating history, a good reputation and is familiar to many state regulators streamlines takeover approvals.

The third prong is that management is focused on running American Water more efficiently. Management intends to reduce expenses to 31.5% of revenue by 2023, down from 35% in 2019 and from 46.1% in 2010. The company is cutting its cost-to-income ratio by adopting technology, improving supply systems and by scrutinising costs. Because returns are regulated, cutting costs is usually the quickest route for a utility to boost returns to shareholders.

The three prongs have helped American Water deliver solid shareholder gains in the past five years – the company has recorded a compounded growth rate of 10% in dividend payments and average annual revenue growth of 3% over the period. In coming years, they are likely to help American Water deliver to investors what they expect from infrastructure and utility assets – namely, dependable and transparent earnings streams spiced with some capital growth.

To be sure, none of American Water's strategies is guaranteed to succeed to the extent sought; dealing with so many regulators has its time-consuming side and regulators could always make unfavourable decisions when it comes to regulated returns. In addition, climate change could complicate operations of water utilities and the company has financed takeovers and capital spending with debt of US$7.6 billion at the end of 2018. Even allowing for these qualifications, American Water has fulfillable plans in place that are likely to provide investors with secure cash flows and some capital growth from low-risk activities in coming years.

Four arms

The history of American Water traces to 1886 when the American Water Works & Guarantee Company was founded. While much happened in between, 2003 was a year of note because American Water was acquired then by the German utility RWE, which in 2008 listed the company via a 'spin-off'.
American Water these days consists of four businesses. The most important is the regulated business that operates metered water services in about 1,600 communities in 15 states, each with a regulator. This unit's assets consist of 51,000 miles (82,000 kilometres) of pipes, 621 water-treatment plants, 1,000 wells, 130 wastewater plants, 1,300 water-storage facilities and 1,400 pumping stations. This regulated business brings in more than 85% of the company's revenue even though water customers on average pay less than one US cent per gallon. About 25% of regulated revenue is sourced from New Jersey while another 20% comes from Pennsylvania.

American Water's unregulated arm (or 'Market-Based Business' as the company calls it) includes its Contract Operations Group, which runs water facilities for cities and businesses. Another is the Homeowner Services Group, which offers services to 1.5 million homeowners and small businesses to guard against the cost of repairing water and sewer pipes. Lastly, the Military Service group provide water services to about 16 US military bases.

With these businesses, American Water is primed to help improve the US's decrepit water and wastewater systems in coming years while keeping investors happy.

IMPORTANT NOTICE

MFG Select Infrastructure Fund - Class 2 (**'Fund'**) is a sub-fund of MFG Investment Fund plc, an open-ended umbrella fund with segregated liability between sub-funds, which is incorporated in Ireland and authorised under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended).

This document provides a summary information regarding the Fund. Magellan Asset Management Limited trading as MFG Asset Management (**'MFG Asset Management'**) is the investment manager and promoter of the Fund. This material must not be copied, reproduced, published or distributed without the prior written consent of MFG Asset Management.

No representation or warranty is made with respect to the accuracy or completeness of any of the information contained in this document and is subject to change at any time and no person has any responsibility to update any of the information provided in this material. You should not construe the contents of this material as legal, tax, investment or other advice. If you are in any doubt as to whether or not an investment in the Fund is suitable for you, you should consult your bank manager, stockbroker, solicitor, accountant or other financial adviser. You (either alone or with the help of an appropriate financial or other advisor) should inform yourself as to the merits and risks of such an investment and have sufficient resources to be able to bear any losses that may result from such an investment.

Please see the Fund's Prospectus for a discussion of certain risks that should be considered by you. No distribution of this document will be made in any jurisdiction where such distribution is not authorised or is unlawful. There shall be no sale of shares in any jurisdiction in which an offer, subscription or sale would be unlawful, and in any event no securities shall be sold until authorisation has been obtained from the relevant regulatory authority. This document does not constitute, and may not be used for the purpose of, an offer or solicitation in any jurisdiction or in any circumstances in which such offer or solicitation is unlawful or not authorised or in which the person making such offer or solicitation is not qualified to do so. It is the reader's responsibility to inform themselves about the above restrictions.

MFG Asset Management will not be responsible or liable for any losses, whether direct, indirect or consequential, including loss of profits, damages, costs, claims or expenses, relating to or arising from your use or reliance upon any part of the information contained in this document including trading losses, loss of opportunity or incidental or punitive damages.

The investment program of the Fund presented herein is speculative and may involve a high degree of risk. It is not intended as a complete investment program and is suitable only for sophisticated investors who can bear the risk of loss. The Fund may lack diversification, which can increase the risk of loss to investors. The Fund's performance may be volatile. The past performance of the Fund is not necessarily indicative of future results and no person guarantees the performance of the Fund or the amount or timing of any return from it. There can be no assurance that the Fund will achieve any targeted returns, that asset allocations will be met or that the Fund will be able to implement its investment strategy or achieve its investment objective. The management fees, incentive fees and allocation and other expenses of the Fund will reduce trading profits, if any, or increase losses. The Fund will have limited liquidity, no secondary market for interests in the Fund is expected to develop and there are restrictions on an investor's ability to withdraw and transfer interests in the Fund. In making an investment decision, you must rely on your own examination of any offering documents relating to the Fund.

The S&P Global Infrastructure Net Total Return Index is a market capitalisation weighted index that is designed to track 75 companies from around the world diversified across three infrastructure sectors energy, transportation and utilities. Index results assume the reinvestment of all distributions of capital gain and net investment income using a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.
